My bigger problem is that the setup exits with some message that begins with 'Setup is unable to find a supported product on your system..' I turned off the integrated audio in the BIOS, but the computer still isn't detecting the card.. Anyone know what I can do?Download the Creative Sound Blaster Live Value Driver (CT4780) Driver.. Hi everyone, Just got an old Creative Sound Blaster Live! From a friend, and I'm looking to use it instead of my fuzzy onboard Realtek audio.. Could it be that it needs more power or something? When I look at my attached devices, the card shows up as an unknown device, but I don't know how to get past that. [Dark Bestiary Download](#)
